SUMMARY

Flutter Software Engineer with 3+ years of experience shipping cross-platform mobile and desktop applications for Android and Windows. Proven track record delivering production-grade systems with Dart, Flutter, Firebase, REST APIs, WebRTC, BLoC/Cubit, Riverpod, Drift, and Hive. Hands-on experience integrating LLM APIs (OpenAI, Claude) and building AI automation pipelines with n8n. Strong foundation in software architecture, state management, local-first design, and CI/CD workflows using GitHub Actions.

EXPERIENCE

Self-Employed

Nov. 2022 – Present

Freelance Flutter Developer

6th October City, Egypt

- Engineered and shipped multiple Flutter applications for Android and Windows, covering end-to-end development: architecture design, Firebase integration, REST API consumption, responsive UI, local persistence, and release artifact generation.
- Implemented scalable state management using BLoC, Cubit, and Riverpod patterns; integrated Firebase Auth, Firestore, Realtime Database, Firebase Storage, and Remote Config across production apps.
- Established Git/GitHub-based development workflows with documentation, structured code review, and AI-assisted development practices that kept implementation decisions auditable.
- Designed and deployed n8n automation pipelines integrating OpenAI and Claude APIs with webhooks, conditional routing, and smart notifications to eliminate repetitive product and content operations.

Local School & Private Sessions

Aug. 2023 – Oct. 2023

Programming Instructor

6th October City, Egypt

- Delivered structured instruction in programming fundamentals, OOP, data structures, algorithms, and debugging to students across skill levels.
- Guided students through problem decomposition, clean implementation habits, and code-review thinking, building practical software development skills.

PROJECTS

Brox | *Flutter Desktop, Dart, Hive, BLoC/Cubit, GoRouter, GitHub Actions, Windows* Offline-first operations platform

- Architected and built a local-first Flutter desktop operations system covering check-in/checkout, live sessions, reservations, kitchen inventory, finance, staff management, memberships, analytics, role-based access control, audit logs, backup/restore, and app diagnostics.
- Designed the application around GoRouter shell routing, BLoC/Cubit state management, Hive CE local persistence, JSON-backed repositories, EasyLocalization, and shared UI primitives with Windows release scripts and GitHub Actions CI/CD.
- Maintained a production-scale codebase: **531 Dart source files, 98 unit test files, 520+ widgets**, local schema versioning (v3), and complete release documentation.

Rain | *Flutter, Dart, WebRTC, Firebase, Drift, Riverpod, Android, Windows*

Private P2P communication app

- Built a peer-to-peer encrypted chat application for Android and Windows featuring accepted-friendship gating, WebRTC data-channel messaging, one-to-one file transfer, voice calls, and video calls.
- Architected the system as a multi-package monorepo separating Flutter UI, Riverpod state, Drift local persistence, Firebase Auth/Realtime Database signaling, Remote Config, session policy, and WebRTC media/data primitives.
- Implemented username authentication, friend search, friend requests, contact blocking, call/file conflict guards, direct/relay route visibility, and connection recovery states across Android and Windows release targets.

AI Workflow Automation | *n8n, OpenAI API, Claude API, Webhooks, REST APIs* LLM-powered automation pipelines

- Built repeatable n8n workflows connecting OpenAI and Claude APIs, webhooks, and external services into production AI automation pipelines.
- Automated data processing, AI-generated content workflows, smart notifications, conditional routing, and error-aware execution paths to reduce manual operations.

CampusSuit | *Flutter, Firebase, REST APIs, BLoC*

University activity platform

- Developed onboarding flows, campus activity feeds, event management, and user profile features backed by Firebase and REST API integrations.
- Applied feature-based architecture and structured BLoC state management to keep UI, data, and business logic independently maintainable.

So She Picks | *Flutter, Firebase, Responsive UI*

Mobile e-commerce app

- Delivered a responsive mobile ordering experience with Firebase-backed order management, checkout flow, and loyalty points system.

EDUCATION

AEA Academy

Oct. 2020 – Jul. 2024

Bachelor of Science in Computer Science

6th October City, Egypt

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, Database Systems, Operating Systems

LEADERSHIP & COMMUNITY

Google Developer Student Club (GDSC)

Oct. 2022 – Oct. 2023

Flutter Lead

AEA Academy

- Led Flutter learning tracks and mentored beginner developers; co-organized community technical events including NextGen and Google I/O Extended activities.

ICPC – Collegiate Programming

Jun. 2020 – Oct. 2023

Core Team Member

Competitive Programming

- Organized algorithmic problem-solving contests and supported new participants in developing competitive programming and analytical thinking skills.

TECHNICAL SKILLS

Languages: Dart, JavaScript, Python, C++, Java, HTML, CSS

Mobile & Desktop: Flutter, Flutter Desktop, Android SDK, Windows desktop, responsive UI design, Figma

Architecture & State Management: BLoC, Cubit, Riverpod, MVC, GoRouter, repository pattern, feature-based architecture, multi-package monorepo

Backend & Databases: Firebase Auth, Cloud Firestore, Realtime Database, Firebase Storage, Remote Config, REST APIs, Drift (SQLite ORM), Hive, SQL, NoSQL

Real-Time & AI/Automation: WebRTC (voice/video/data channels, P2P signaling), n8n, OpenAI API, Claude API, LLM integration, webhooks, prompt engineering

DevOps & Tools: Git, GitHub, GitHub Actions, CI/CD, unit testing, Docker (familiar), AWS (familiar), debugging, performance profiling

LANGUAGES

Arabic: Native

English: Upper-Intermediate (Professional working proficiency)
